

D&D Facility Characterization Interview Checklist

ID No.: New Breathing Air
Station W. of Building 771
Date: 10/09/00

Page 1 of 2

Check List for – Title: D&D Facility Characterization – Interviews

CRITERIA: Δ *D&D Characterization Protocol*, RFETS MAN-077-DDCP, Rev. 0
 Δ *Facility Disposition Program Manual*, RFETS MAN-076-FDPM
 Δ RFETS Radiological Safety Practices, January 12, 1998

Facility Name & Type (1, 2, or 3) Breathing Air Station, Type 1 Facility, New Facility W. of B771

Personnel Interviewed (Name & Title/Function) Don L. Cox, Mechanical Engineer V, D&D Closure

-- Y/N --

Does a current WSRIC exist for the facility? N

If so, are there exceptions to the WSRIC as written?..... No WSRIC, no Exceptions

COMMENTS (incl. WSRIC contacts)

WSRIC Contact is James M. Schoen who is in charge of the WSRIC Reports, T130J, X3579, C-83.

Are rad surveys available that indicate current status of the facility? N

Are historical rad surveys available that indicate historical status, or evolution, of the facility? N*

COMMENT N* According to Sarah J. Roberts, X3008, ARCD, T771Q, any

Historical data, which is probably at the Federal Center, would not be adequate for unrestricted release (i.e. Pre-Demolition Survey or Property Release Evaluation). New monitor surveys would have to be taken.

Is an HRR available for the facility?..... N

Do any other reports exist beyond the HRR (e.g., spill reports, reportable incidents, etc.) that further

Characterize the facility relative to chemical &/or radiological contamination? N*

Are engineering drawings (esp. "as-builts") available?..... N*

* Engineering as-built drawings are not available.

Are any non-conformances or issues with the facility status currently being tracked in PATS? N

If so, what are the issues (note in Comments, below)?

COMMENTS N* The New Breathing Air Facility (west of B771) sits on IHSS/PAC 700-150.2 and/soils, as per, Nick Demos, ER Characterization/HRR Manager, X4605, Therefore, the facility land/soils has CERCLA concerns. Engineering drawings, as-builts, do not exist for the facility This facility should not contain any lead-based paints because the facility is only approximately 1 year old.

Have any types of chemical characterization, incl. Asbestos, been performed recently?..... N*

If so, what types of characterization were performed (note in Comments, below)?

COMMENTS N* No asbestos characterization data exists for New Breathing Air Station Facility west of Building 771 according to Bret Clausen, X, Building 130, Room C-252. The asbestos data reports are located in Cubicle 273, of Building 130 and the reports are under the control of Bret Clausen with Rae Eklund as backup contact for the asbestos reports the facility is new enough (1 year old) that it probably does not contain any asbestos.

D&D Facility Characterization Interview Checklist

ID No.: New Breathing Air
Station W. of Building 771
Date: 10/09/00

Page 2 of 2

What timeframe did the interviewee work in the facility? N/A, the facility is the New Breathing Air Station west of Building 771.

Has the building configuration changed since you worked in the building? If so, in what way?

No, the facility is a New Breathing Air Station that is not in service.

What types of equipment were in the building during the interviewee's time there? N/A., The New Breathing Air Station has two new compressors, air tanks, air dryers, miscellaneous piping, and system control panels.

Where was the equipment located? (specific rooms/areas) The new Breathing Air Station west of Building 771 is installed on two concrete pads outside of Building 771 near the west wall on the hillside.

Were any radioactive materials or metals handled in the building? If so, what types? No, none

Which equipment handled radioactive material? N/A

Were any chemicals handled in the building? If so, what types? N/A

Did any spills or uncontrolled releases of radioactive materials or chemicals occur while you were working in the facility? No, none.

Were these spills/releases cleaned-up? How were they cleaned-up? N/A

Where did these spills/releases occur? N/A
